

SAVING ENERGY IN
TRADITIONAL NORTH
EAST HOMES

PART 2 – 30th NOV

November Conference 2021

Welcome to Part 2

Thank you for joining us again for another night of expert speakers lined up. If you missed Part 1 or wish to watch the recording again, please go to:

<https://www.savingenergyaberdeen.co.uk/conference/>

In Part 1 we discussed:

EPC reform with the new targets of EPC Band C requirement by 2028 for Private Rented Sector and 2033 requirement of EPC Band C or better by 2033 for owner occupiers set by Scottish Government.

The need for at least 1 million on-gas homes switching to zero emissions alternatives.

The customer journey and the need for an affordable, guided route to improving the energy efficiency and comfort of our homes.

The importance of checking our homes as they age for repair and maintenance.

The importance of breathability in insulating our granite and stone homes
And how the Whole House retrofit approach can reduce the risk of fuel poverty and save on energy bills and provide a more comfortable home.

Welcome to Part 2

Once again please ask questions in the chat and we shall try to answer as many as we can this evening.

We received a good mix of questions in Part 1 and we shall upload answers for all to see to our Saving Energy Aberdeen website.

So please keep those questions coming!

We would also be grateful if you can give any feedback either on the chat or by email to myself on what you would like us to focus on for Conference 2022 please.

We are hoping to include Planning and Conservation, approved insulation materials, ASHP's, accredited contractors but please help us with where you would like our journey to head next.

Many thanks for joining us on this Energy Efficiency journey.

This is our Part 2 programme.

Let's welcome our first speaker Rod McGovern of Farm Energy Consulting. Ltd.
